

ROCKET RACK

INSTALLATION INSTRUCTIONS

Requirement

1. Fork with drilled crown, axle to crown distance 365 to 400mm, front eyelets on your fork dropout.
2. If your fork doesn't have eyelets, purchase Rocket Rack stainless axle bracket.

Mounting Steps

1. Choose the right height and attach the stainless plate on both rack legs with M5x14 bolts, washer and nuts.
Align both plates on the edge of oval holes on rack legs, either left or right.
2. Mount both legs inside (or outside) of M6 bosses on the platform.
The tongue has enough clearance to fits most caliper brakes.
3. Attach the tongue on the platform with M5x12 bolts and washers.
The tongue has enough clearance to fits most caliper brakes.
4. Mount the racks on the fork and adjust it to the best fit.
